

SPARTAN PROGRAM

Semiannually Proctored Attack
Readiness Testing + Analysis Navigation

Subscription-Based Cyber Risk Testing
For Only \$2,249/yr

Annual Membership Proposal

INTRODUCTION

SPARTAN Takes the “What If?” Out of Your Cybersecurity Strategy

Cyber Risk Assessments (also known as Penetration Tests) identify and detail vulnerabilities and compliance issues in an organization's network.

There's a difference between being compliant and being secure. Our comprehensive, third-party cyber risk assessment pinpoints compliance issues *and* cybersecurity vulnerabilities.

You don't have to be a Tier 3 client to enroll. SPARTAN membership is for any organization looking for practical insight into their network for a low price, without contracts or add-ons.

The SPARTAN Program is a cost-effective alternative to Penetration Testing as a Service (PTaaS) software.

Gain a concrete understanding of your network and make *evidence-based decisions* about your cybersecurity and compliance strategies.

SAFE.

SIMPLE.

EFFECTIVE.

BUILT FOR DECISION-MAKERS

who want to understand their cyber risk without a long-term contract, our first-of-its-kind SPARTAN Program is an innovative new risk evaluation model designed to deliver industry-leading insight at an industry-low price.

PROGRAM OVERVIEW

MEMBERSHIP BASICS

Two cyber risk assessments every year, with detailed reports and advice from a cybersecurity expert.

\$2,249 for a one-year membership, payable upon enrollment. Our flat-rate pricing strips away costly add-ons you don't need and won't use.

100% Money-Back Satisfaction Guarantee. If you're not satisfied with our insights and service, we'll refund the current year's membership fee in full.

No contracts. No autorenewals. No hidden fees.

MEMBERSHIP PERKS

A \$250 referral bonus for referring a new member. We'll also provide a \$250 discount for the referred business or organization.

Pick a cybersecurity professional's brain twice a year.

STREAMLINED TESTING

- Tests are administered using secure, third-party risk assessment software.
- No downtime. No disruptions.
- Hassle-free. Just click and let the test run in the background.
- Your data stays secure.
- No software to install.
- We'll reach out before each test so you know exactly what to expect.

SPARTAN ADVICE IS SMART ADVICE

SPECIFIC

MEASURABLE

ACHIEVABLE

REALISTIC

TIME-BOUND

We'll review our findings, outline practical ways you can mitigate issues and measure your progress, and answer any questions you have about your results.

SPARTAN

(Semiannually Proctored Attack
Readiness Testing + Analysis Navigation)

VS

PTAAS

(Penetration Testing as a Service)

\$2,249

\$15,000 avg

Turnkey solution—low effort to initiate and maintain.

Requires significant effort, setup, scripting, and debugging.

Includes a guided review with a cybersecurity expert.

Limited unless you are highly skilled in pen testing.

Uses Galactic Advisors' premium third-party software.

Requires you to select, license, and operate tools.

Helps support audits, MSP evaluations, and budget planning.

Must know how to map findings to frameworks (e.g., NIST, ISO).

Professional PDF reports suitable for stakeholders. Includes vulnerability ranking and practical guidance.

Requires your own formatting and report creation.

How It Works

1

You'll receive an invoice from us within three business days. We'll reach out and gather some basic info for your assessment—number of users, etc.

2

We'll schedule your first cyber risk assessment. Your first assessment will take place within 60 days of enrollment.

3

Prior to your first assessment, we'll send over a few simple instructions. The process is efficient and requires minimal involvement on your end.

4

After the walkthrough of our findings, we'll schedule your follow-up test. The second assessment will occur approximately six months after the first.

MAXIMUM INSIGHT

Identify your level of vulnerability to malware, ransomware, and other devastating attacks. Learn how to improve. Test every six months to measure your progress.

SECURE, THIRD-PARTY TESTING

Our assessment software is provided by Galactic Advisors, a third-party vendor with whom we partner to provide affordable access to an otherwise very expensive test.

SAFE, SIMPLE, AND CONFIDENTIAL.

The testing process is safe, fast, and 100% private. No disruptions or downtime.

ANALYSIS NAVIGATION

Our post-assessment walkthrough of your findings will include a review of minor, moderate, and critical vulnerabilities, key takeaways, and practical advice.
